Boiler Passport

Stage 1: Check the installation

Stage 2: Check the appliance

Boiler PassportGolden Rules

Failure to comply with the below requirements may invalidate all warranties

To the Householder:

- This appliance must be serviced annually in accordance with the appliance manufacturer's instructions and the service records within this document completed.
- 2) To ensure your continued Boiler Warranty the annual service must be carried out by a person registered with a competent persons scheme e.g. An OFTEC Registered Technician. Use of non-competent persons may invalidate this warranty. A list of OFTEC Registered Technicians is available at www.oftec.org or alternatively telephone OFTEC on 0845 658 5080 (UK) or 01 864 6637 (Rol).

If there is any doubt as to the suitability of your technician, please check with the manufacturer prior to the work being carried out.

To the Installer:

- 1) The installer is responsible for completing this passport and returning the paperwork to the manufacturer.
- 2) This appliance must be correctly commissioned in accordance with the appliance manufacturer's instructions and registered with the manufacturer.
- 3) The Central Heating System must be cleansed with a proprietary cleanser and treated with a proprietary corrosion inhibitor, the concentration of which must be checked at each annual service.
- 4) The incoming cold water mains supply to a combi boiler must be fitted with a suitable and effective hard water treatment.
- 5) A fuel filter with a filter rating of 70 microns or better must be fitted to the fuel supply to the appliance, in accordance with the burner manufacturer's recommendations.

When contacting the manufacturer, please have this document to hand.

Purpose of this document

The Boiler Passport is designed to ensure that all the necessary information relating to the life of an appliance is correctly recorded, stored and communicated to the manufacturer for the purpose of continued product improvement.

The installer must arrange for the commissioning engineer to complete the Commissioning Certificate portion of this passport in order to validate the warranty.

If this passport is not completed, the warranty may be invalidated.

How to use this document

This document contains a Commissioning Certificate, including an Installation Checklist, to be completed by the commissioning engineer. A copy of the Commissioning Certificate remains in the Passport for future reference.

This document also contains a series of Service Records to be completed by the service engineer.

When the appliance is commissioned the commissioning engineer must fill out the Commissioning Certificate then contact the manufacturer to notify them of your work. The Boiler Passport remains with the appliance as a life-long record of all work undertaken.

Important notice

Completion of this Boiler Passport does not remove the need to complete OFTEC controlled documents within England, Wales or Scotland nor does it remove the need to notify installations or commissioning and/or obtain building warrants in these regions.

Your details will be used by the manufacturer to provide customer services, information about extended warranties and for other marketing purposes. They will disclose your information to their service providers and agents for these purposes. Your details may also be used by other third parties for other marketing purposes. The manufacturer and the third parties may contact you by mail, email or telephone. If you do not wish for them to use your data for other marketing purposes please put an X in this box

Instructions

How to complete the Commissioning Certificate and register the appliance

1) Complete the Commissioning Certificate

- Unfold the pages on the left
- Fill out the top page completing all the appropriate sections in BLOCK CAPITALS (Do not write on the bottom page)
- A carbon copy will be produced on the bottom page automatically

2) Register the appliance

 Tear out the top page of the Commissioning Certificate along the perforation on the right

3) Then

• Fold the Commissioning Certificate and post it to the manufacturer using the selfaddressed envelope provided

Or

• Fax the Commissioning Certificate to the manufacturer (refer to the Boiler Manual for fax number)

Or

• Use the original as a reference when registering the appliance online (refer to the Boiler Manual for website address)

If the appliance is not registered, the warranty may be invalidated
